The World's Most Compact Label Gluer

LABEL-PRO[®] 5.5 Label Gluers

Fast. Neat. Trouble-Free. Glue-Fast Equipment Co., Inc. introduces new motor driven and manual LABEL-PRO[®] 5.5 gluers that are fast and efficient for most short-to-medium run labeling jobs.

50% Adhesive Savings. The LABEL-PRO 5.5 gluers automatically spread a uniform corduroy pattern of adhesive from edge to edge on any paper label up to 5.5" in width, no matter what shape or length. The corduroy glue pattern results in double the number of labels glued per gallon versus a solid glue pattern. (Over 10,000 3" x 5" labels can be glued per gallon using GF#5 glue.)

The LABEL-PRO 5.5E is the smallest motor driven label gluer in the world. The operator simply places the label into the gluer. The label automatically trips a switch turning on the motor which powers the rubber label feed roller and metal glue rollers. The motor stops one second after the label exits the gluer. This "impulse" system gives your adhesive longer "pot life" resulting in additional adhesive savings.

The LABEL-PRO 5.5H is the manual (no motor) version. Both models are handsome desktop machines and are perfect for office or factory use.

Standard features of both machines include:

- Large tank capacity
- Easy to fill, empty, and clean
- Minimized surface area reducing glue evaporation
- Operates well even when almost empty
- Sturdy construction, won't tip or slide
- Requires desk space of only 7.5" x 7.5"

Options for both models include:

- Wick rollers to be used with water for moistening gummed and dry labels
- 220 volt, 50/60hz version available – LPR5.5E-220

MODEL	MAXIMUM LABEL WIDTH		ELECTRIC MOTOR	FEED-TABLE DIMENSIONS depth x width	NET WEIGHT lbs.	BENCH SPACE REQUIREMENT
	inches	mm				
LPR 5.5E	5.5	140	Yes	5.7" x 4"	6	7.5" x 7.5"
LPR 5.5H	5.5	140	No	5.7" x 4"	5	7.5" x 7.5"
