

Colonel AG Gluer

Optional Glued-Side-Up Reversing Fingers Shown Above

The Colonel AG

The Best Hot Protein Glue Machine!

Introducing the most advanced hot protein glue machine on the market today! Simply feed the cover into the gluer to apply an even film of glue, quickly and neatly.

Adjusting two knobs controls the glue film. Operator feeds cover into gluer. Standard gluer presents cover glued side down.

Available in the following roller widths: 20", 26", 32", 36" and 42"

Our **AG-90** glue is a great product for use in this machine costing under \$.03/square foot!

Featuring:

- Direct heated glue tray with digital temperature control
- Stainless steel rollers, glue tray and pick-off points
- Variable speed control
- Teflon bushings
- Shaft scrapers
- Efficient 220/230 voltage, 50/60 Hz
- Completely Covered Glue Tray
- Easy to operate and clean.
- Automatic Watering Mechanism to keep glue fresh and at proper solids content

Optional:

- Glued-Side-Up Reversing Fingers Presents covers with glue on top side!
