MARSH®
Marsh Shipping Supply Co., LLC.

The **Rolmark Express** offers a quick, easy and convenient method of applying stencil ink on all types of surfaces, both porous and non-porous. The **Rolmark Express** utilizes the same type of all metal construction that the standard Marsh Fountain Rollers have been using for decades.

The all metal, disposable ink cartridge contains a full 4 ounces of ink and becomes the strong, durable handle once it is screwed on to the fountain roller head assembly. We have matched this tool with our proven 3" long-lasting, replaceable neoprene roll to provide a superb stenciling system.

Combine the **Rolmark Express** Fountain Roller System with the Marsh Stencil Machine and Oilboard and you can be sure to have a "System" that will meet your coding needs.

Unlike competitive type systems, the **Rolmark Express** does not have plastic in the roller head assembly or ink cartridge threads. The end result is a long-lasting durable TOOL that will provide superior marks on any surface.

Rolmark Express

Stencil Application System

The new Marsh **Rolmark Express** Stenciling System offers you a portable and convenient method of stenciling on both Porous and Non-Porous surfaces.

- Order Item 33575

- Replacement parts available

Complete your **Rolmark Express** System with the following items:

Climb Aboard...Leave Your Mark!!

Using the Rolmark Express Easy as 1-2-3!

Step 1

- Hold the cartridge in upright position and remove cap. Hold the **Rolmark Express** Roller Head Assembly with the cover on and install cartridge by turning it counter-clockwise until cartridge is firmly in place.

Step 2

- Hold the roller at a 45° angle on a piece of stencil-board and roll it back and forth while pressing the pump several times, until the ink saturates the roll. Make sure the roller is inked uniformly.

Step 3

- Place the cut stencil on the surface to be marked. Gently roll the **Rolmark Express** inked roller back and forth until the cut characters are uniformly inked. Do not apply extra pressure when stenciling.
